CHESTER PAUL COMPANY

SINCE 1948

IN 1948 CHESTER PAUL COMPANY OPENED ITS DOORS AS AN INDUSTRIAL DISTRIBUTOR SELLING ONLY ONE PRODUCT LINE IN SOUTHERN CALIFORNIA—HANSEN QUICK DISCONNECT COUPLINGS. TODAY WE DISTRIBUTE OVER 100 PRODUCT LINES WORLD WIDE.

IN 1998 CHESTER PAUL COMPANY EXPANDED IT'S PRODUCT OFFERING TO INCLUDE A COMPLETE LINE OF WATER TREATMENT COMPONENTS FOR THE DRINKING WATER AND WATER TREATMENT INDUSTRY. WITHIN FOUR YEARS WE BECAME THE LARGEST DISTRIBUTOR OF PLASTIC FITTINGS IN THE COUNTRY AND HAVE BECOME A MAJOR SUPPLIER OF WATER FILTRATION PRODUCTS THROUGHOUT THE WORLD.

SERVICE IS OUR BUSINESS AND OUR CUSTOMERS ARE SUPPORTED BY US THROUGH LARGE INVENTORIES, COMPETITIVE PRICING, EXPERIENCED STAFF, SAME DAY SHIPPING, PRODUCT ALTERNATIVES, MARKETING INNOVATIONS AND A "WILL DO" ATTITUDE.

CHESTER PAUL COMPANY'S MISSION IS TO BE THE DISTRIBUTOR EVERYONE CALLS FIRST FOR PRODUCTS, IDEAS, ALTERNATIVES AND INFORMATION. IT IS OUR DAILY OBJECTIVE TO GIVE OUR CUSTOMERS WHAT THEY WANT, WHEN THEY WANT IT, AT GREAT PRICES.

CHESTER PAUL COMPANY | solid carbon blocks

Introducing the Chester Paul Company Carbon Block CP-CB series. The CP-CB has been engineered using a state-of-the-art compression molding process. This advanced method produces a strong, one piece uniform block. The nature of the manufacturing process helps to reduce or eliminate channelling and carbon fines that can damage down line equipment and contaminate filtered water. The Chester Paul CP-CB series consistently delivers outstanding performance and is unsurpassed at removing chlorine, sediment, taste, odor and organic contaminants. Our carbon blocks are proudly made in the USA and are NSF listed.

CHESTER PAUL COMPANY | sediment cartridges

Chester Paul Company announces its new NSF listed Spun Bonded Polypropylene Cartridges. The CP-SF series is manufactured out of 100% pure polypropylene. Using the highest quality manufacturing, the fibers have been carefully spun together to form a true gradient density from outer to inner surface. Our unique filament matrix provides excellent dirt holding capacity, extending the life of the sediment prefilter.

CHESTER PAUL COMPANY | membranes

Chester Paul Company announces its line of TFC residential (24-150 GPD) membranes. Your system's performance has a direct impact on your reputation and your bottom line. The performance of your reverse osmosis (RO) drinking water system is directly related to the quality of the RO membrane installed in your system. When it comes to performance, CPC elements have a higher flow rate than competitive elements. While CPC elements are rated at 50 PSI, most competitor membranes are rated at 60 PSI (about 20% difference in flow) giving your system higher daily production rates.

- Great Performance • Great Warranty • Priced Competitive
