

Five Stages
50 GPD RO
WITH
ENHANCED
ANTI-SCALING TECHNOLOGY

Introducing Chester Paul's latest addition to our product offering, the new 50 gallon per day reverse osmosis (RO) system with anti-scaling technology. Designed for residential applications, this RO offers solid technology with upgraded features including a designer faucet with high-flow dispense and 3/8" plumbing all at a fair value proposition.

By incorporating anti-scaling, this R.O. system effectively reduces the buildup of unpleasant odors, harmful mineral deposits, ensuring a prolonged lifespan and optimal performance. With a daily capacity of 50 gallons, this powerhouse guarantees a steady supply of clean, purified water for all your household needs.

Experience the quality and reliability in every refreshing sip!
